Full-stack developer with additional experience in product management, technical writing, and education. Eager to contribute his passion for rational creativity to making apps that are enticing for users and maintainable for developers. Most inspired when challenged with complex problems and working with a great team.

Experience

Gameplan Jobs // Jun 2015 - Present

Full-Stack Developer, Product Manager

- Remotely manage development of high-volume assessment and hiring app for companies in the US, UK, Russia, and India
- Create four different versions of user dashboards with Angular based on UX/UI designer's specifications
- Integrate user-facing elements created by other front-end developers with a Rails back-end
- Connect and merge multiple data sources including two external APIs
- Work with contractors to create a REST client, document all 64 requests and responses
- Create a separate job board for UK client using React and Ruby on Rails
- Prioritize project backlog as product owner, anticipate client needs, and formulate solutions to client issues
- Work remotely with three different scrum groups to set realistic sprint goals, participate in and observe code reviews, and merge pull requests on company's GitHub repository
- Write 37 user stories, set QA protocol for tests with RSpec and Jasmine
- Establish scope of information required for machine learning with data scientists, report feasibility to investors, and implement into future designs

Freelance, TCG (Robert-Half) // Apr 2012 - Jun 2015

Editor, Technical and Business Writer

- Wrote 20 pages of SDK and API documentation for QA testing company
- Provided developmental and copy-editing for 340 videos, presentations, and investor proposal decks
- Designed 12 product overviews and wrote the product and market sections of a business plan for a DW/BI startup

Mosaica Education // Jan 2011 - Dec 2013

Curriculum Developer

- Created four online STEM courses with Minecraft and Moodle
- Implemented feedback from teachers for over 200 online course units

Education

Oglethorpe University // Jan 2007 - Dec 2010

B.A. Philosophy

- Built a solid foundation in formal logic and the ability to identify and resolve conflicts within abstract systems
